WHAT IS MISSING?

You remember back in 2002-2003 these **Doom3** pics were released on the Net, but they never made it in the final release **Doom3** game...
Or did you miss something? you don't recall seeing these guys anywhere in final release of **Doom3**!

Or this Zombie with no shirt...

And the hungry dog "Yum Yum" scene...

This scene in Hell?

The revenant in the Underground Cavers?

And in this scene you can see your self on the mirror wearing a helmet...

These guys infront of the generator...

Or the famous "Creepy ass scientist and a teeth gritting soldier" scene...

you will wonder why they were removed in final release of **Doom3**? They looked cool in **Doom3 Alpha** version...

How about the poor soldier being zombified?

And how about the Arachnotron or Spidermastermind?

You guess they never made it past the concept art. Pitty...

Only dumb thing in **Doom3** is the way you run across the Martian surface without wearing a helmet! What do you refuel with those oxygen tanks by the way when you're not wearing a helmet?

Besides, in the old 2002 sneak videos of **Doom3** the player wears a helmet like the rest of the space marines & like in Doom1.
Bu they changed that in the final **Doom3**. They could have at least added a cut scene where he puts the helmet on before he opens the air lock.
You guess that guy must have some pretty strong lungs, being able hold his breath outside the Mars surface for so long!

You thought that was weird? Yes it is...

Is it the same in **Doom3 Ressurection Of Evil**?
